UNDERGRADUATE, ELECTRICAL ENGINEERING AND COMPUTER SCIENCE AND ENGINEERING, IIT KANPUR

EDUCATION	Indian Institute of Technology Kanpur, India <i>Double Major in Electrical Engineering and Computer Science and Engineering</i> GPA: 9.4/10 (5 Semesters) <i>Aug' 17 - Jun' 21 (Expected)</i>
-----------	--

RESEARCH INTERESTS	Probabilistic Machine Learning, Approximate Inference, Optimization, Bayesian Nonparametrics, Representation Learning and Deep Generative Models, Computer Vision
-----------------------	---

PUBLICATIONS	Aniket Das* , Yatin Dandi*, Soumye Singhal, Piyush Rai, Vinay P. Namboodiri, "Joint Image and Video Generation using Residual Vectors" <i>Winter Conference on Applications of Computer Vision (WACV'20)</i> [Under Review] Aniket Das* , Avik Pal*, "TorchGAN: A Flexible Framework for GAN Training and Evaluation" <i>Journal of Machine Learning Research : Machine Learning Open Source Software (JMLR MLOSS)</i> [Under Review] <i>* indicates equal contribution</i>
--------------	---

AWARDS & ACHIEVEMENTS	Academic Excellence Awardee for two consecutive Years at IIT Kanpur Semester Exchange at Aalto University, Finland Among the 2 students selected Joint Entrance Exam Advanced 2017 All India Top 2 Percentile among 200,000 candidates KVPY Scholarship Awardee All India Rank 240, awarded by Indian Institute of Science
--------------------------	--

SELECTED PROJECTS	Probabilistic Models for Joint Image and Video Generation <i>Prof. Piyush Rai and Prof. Vinay P. Namboodiri, IIT Kanpur</i> <i>Mar '19 - July '19</i> <ul style="list-style-type: none">- Investigated several models for video generation, forecasting and representation learning, with particular focus on video generation models and models that disentangle content and motion- Developed a hierarchical model for joint image and video generation that generates a summary frame for the video, and models individual frames by adding residual vectors to the summary frame representation at each timestep.- Developed an analogous hierarchy for models that disentangle content from motion, by adding to the base content representation, a residual content vector at every timestep- Implemented proposed models for both VAEs and GANs. Performed human evaluation on Amazon MTurk and observed significant improvements in both image and video generation- Paper is submitted to <i>Winter Conference on Applications of Computer Vision (WACV) 2020</i>. Currently working on generalising the image latent space interpolation to datasets of rotated objects TorchGAN: A Flexible Framework for GAN Training and Evaluation <i>Independent Open Source Project : [Code] [Docs]</i> <i>Dec'18 - Sep'19</i> <ul style="list-style-type: none">- Developed a lightweight customizable PyTorch framework for training and evaluation of GANs- Wrote efficient implementations of various GAN models, losses, evaluation metrics and stability enhancement features and designed a customizable framework for effortlessly extending them- Project hosted on Github has over 800 stars. Paper is currently submitted to the <i>Journal of Machine Learning Research: Machine Learning Open Source Software (JMLR MLOSS)</i>
----------------------	--

ONGOING PROJECTS	Stein's Method: Theory and Applications <i>Prof. Piyush Rai, IIT Kanpur</i> <i>Sept. '19 - Present</i> <ul style="list-style-type: none"> - Exploring avenues such as Amortized MCMC, Functional KL Minimization for Nonparametric Models, and optimization in Natural Parameter Space where employing Stein's Method for Variational Inference or Gradient Estimation may lead to improvements - Currently surveying the literature on Stein Gradient Estimators, Amortized MCMC Algorithms, and Natural Gradient methods such as K-FAC and its variants, and "Inference via Weight Perturbation" algorithms like VADAM and VProp 	
	Online Kernel Learning and Optimization Algorithms in RKHS <i>Prof. Ketan Rajawat, IIT Kanpur</i> <i>Sept. '19 - Present</i> <ul style="list-style-type: none"> - Investigating algorithms for functional optimization in Reproducing Kernel Hilbert Spaces and the problem of scaling kernel learning and nonparametric function approximation to streaming data - Currently surveying the literature on Online Kernel Learning and Nonparametric Stochastic Optimization Algorithms 	
SKILLS	Languages: <i>Proficient:</i> Python, C, C++ <i>Familiar:</i> Julia, Octave, Javascript Deep Learning Frameworks: Pytorch, Tensorflow, Flux.jl Data Science Libraries: NumPy, Pandas, Pillow, Scipy, Scikit-Learn, Gensim Utilities: Linux Shell, Git, Vim, Docker, L ^A T _E X, Amazon AWS, Amazon Mechanical Turk	
RELEVANT COURSEWORK	Introduction to Programming A* Linear Algebra & ODE A Partial Differential Equations A Probability and Statistics A Signals and Systems A Topics in Probabilistic Modelling and Inference A Machine Learning for Signal Processing <i>i</i> A*: Exceptional Performance (Top 1%) <i>i:</i> In progress <i>a:</i> Audit	Data Structures and Algorithms A Real Analysis and Multivariate Calculus A Complex Analysis A Stochastic Processes <i>i</i> Statistical Signal Processing <i>i</i> Convex Optimization <i>a</i>
MENTORSHIP ROLES	Project Mentor : Exploring Probabilistic Machine Learning <i>Programming Club, IIT Kanpur</i> <i>May. '19 - July '19</i> <ul style="list-style-type: none"> - Mentored a group of fourteen freshmen on Probabilistic Machine Learning and its applications - Conducted lectures, authored weekly assignments and mentored projects on Bayesian Matrix Factorization, Black Box VI and Auto Encoding VB, Stepwise and Incremental EM, and SVI 	
	Project Mentor: Exploring Generative Adversarial Networks <i>Association of Computing Activities, IIT Kanpur</i> <i>Mar. '19 - May. '19</i> <ul style="list-style-type: none"> - Mentored a group of eight freshmen on Deep Generative Models and Generative Adversarial Networks - Conducted lectures and designed assignments for implementing GAN models, losses and metrics 	
	Coordinator: Special Interest Group in Machine Learning <i>IIT Kanpur</i> <i>Sept. '19 - Present</i> <ul style="list-style-type: none"> - One of the four Coordinators of the SIGML, the Institute forum for student researchers in ML - Responsible for delivering and conducting talks on current research and special topics in ML
